For more than 25 years, we have been producing high-class inflatable boats for every situation. 15 models in lengths from 180 to 450 cm are available for you to choose from at . Our inflatable boats are mainly made from PVC Dechitex Strongan 1100 material. Breathtaking driving dynamics paired with incredible versatility are what make our inflatable boats so special. Whether for fishing, leisure, work boats, or tenders, there is something for everyone. Browse through the pages or let our staff advise you.

LIFE JACKETS

Allroundmarin stands for safety on board.
A life jacket can save lives.
Here you will find all Allroundmarin life jackets. Automatic, manual, solid life jackets, and children's life jackets.

RAILBLAZA MOUNTING SYSTEMS

With many possible applications , you can customize your inflatable boat. Mounting bases provide the foundation for attaching various accessories, such as mounts for a tablet or rod holders.

INFLATABLE BOAT CLEANING

Always keep your inflatable boat clean, so you can enjoy it for a long time.
With our care products, you are well equipped, whether for your inflatable boat or other materials that are exposed to sun, wind and water.

AIRSTAR

With its "AirStar" boats, Allroundmarin has created a new type of boat that perfectly meets the requirements of modern mobility on the water: sporty and functional, intelligent and efficient. Assembly is extremely simple. And, most importantly, the price/performance ratio is easy on your leisure and vacation budget.

JOLLY CARBON 180

WITH CARBON SLATTED BASE

The Jolly Carbon 180 is the breakout model in the popular and long-standing Angel Jolly series.
New features make this inflatable boat something special and an even more practical boat. Above all, the Jolly Carbon impresses in terms of weather resistance and maintenance.

The seat board is now even more stable and resistant to salt water and weather conditions thanks to the change in material from wood to carbon, and can be moved continuously. This allows the seating position to be adjusted to suit the situation. The wooden slats have also been replaced by carbon boards. Additional highlights include the PVC-coated transom and reinforced rubbing strakes on the underside of the tube. Now all you need are the Railblaza fishing rod holders and the Jolly Carbon is ready for your next fishing trip.

Replacement seat board for Jolly Carbon 97 8684

JOLLY GS

There are several good reasons to choose one of these tender boats.
They are small and lightweight, and thanks to their flat rolling bottom, these boats always sit securely and stably on the deck of your yacht. The shore or a jetty can be quickly reached around the clock for a shore leave to run any necessary errands. They are indispensable small dinghies at sensational prices that can also be quickly packed up and stowed away again.

VARIO

WITH HIGH-PRESSURE AND/OR ALUMINUM BASE

These Allroundmarin inflatable boats offer more than meets the eye! The Vario model series is the further development of the popular JokerMax! Features such as the extra width of up to 173 cm, the inflatable V-keel, and the continuously adjustable seat boards remain unchanged. It's more than just an inflatable boat, it's a partner for your vacation, fishing, and leisure time!

VARIO INFLATABLE BOAT WITHOUT FLOOR

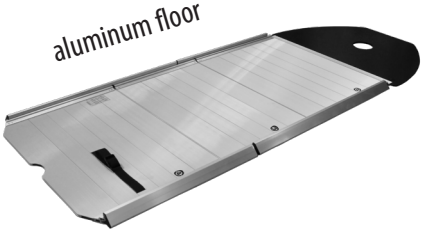

+

High-pressure air floor

AND OR

aluminum floor

The features of the Vario models speak for themselves! Raiblaza Ribport mounts on the tubes (gray and red model 4, green model 6 pieces) which can be used to mount bimini tops, rod holders, ladders, and much more. They have 4 Velcro straps on the inside for attaching paddles or rods and a sliding seat board. For better handling, there are two additional carrying handles at the stern. Three reinforced rubbing strakes on the underside of the boat ensure an even longer service life. The 360 models have a double rubbing strake on the sides. The green model also features 4 pre-glued mounting eyelets for an optional bow platform. The red Vario is perfect for water rescue or diving trips, **as it meets the requirements of fire departments and** the standards E DIN EN ISO 6185-1 to E DIN ISO 6185-3**in terms of safety** . It also complies with EC Directive 2013/53/EU**,** as do all other Allroundmarin inflatable boats.

Choose between a high-pressure air floor and an aluminum floor. An additional floor for different conditions is also available. Please note: The floor must always be ordered separately from the boat! However, **the** hard inflatable keel, which gives the boats high stability and directional stability, is standard on all VARIOS models.

3 additional scuff boards

Sliding seat board

double baseboards

Carrying handles at the rear

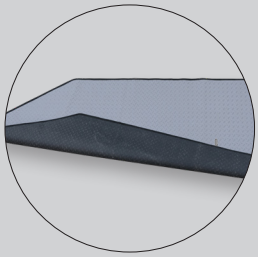

Railblazer Ribports included; for various mounting systems, see page 170 onwards.

VARIO 300 PRO

The perfect boat for carp anglers and catfish hunters! Optimized through years of tough practical experience, the olive-green Vario 300 impresses with its ingenious features.
The interior width of 80 cm provides space for all your tackle.

The recessed mirror not only increases the interior length to a whopping 2.17 m, but also ensures carefree drilling fun thanks to its short rear cone.
The popular "Vario concept" means more choice for you: you can choose between a lightweight high-pressure air floor and a sturdy aluminum floor. Both are available in an inconspicuous midnight black, as are the paddles.

Safety first: A sturdy, 20 cm wide protective strip runs completely around the underside, and there is a second one on the outside for optimum protection.
Thanks to the sleek design with sturdy soft handles in the perfect places but without unnecessary eyelets, your line always glides smoothly along the outside of the Vario PRO and you can enjoy fantastic fishing fun.

Available in 2 colors!

Basic equipment:
2 removable, sliding carbon seat boards, 2 detachable oars, safety lines, recessed valves, high-pressure air pump, carrying bag, and repair kit.

AS BUDGET

with removable aluminum floor and inflatable V-keel

The AS Budget 320 from Allroundmarin redefines entry into water sports.

This inflatable boat is specially designed for recreational use and focuses on the absolutely essential equipment without compromising on quality. The sturdy aluminum floor guarantees safety and stability on board, while the sliding seat board offers maximum flexibility.

Visually, the model impresses with its modern dark gray color, which gives the boat a particularly contemporary and elegant look.

Technical highlights such as the PVC-coated transom and welded seams ensure a long service life. Robust rubbing strakes and practical grab handles round off this package, creating a product with an excellent price-performance ratio.

Basic equipment:
Detachable aluminum floor, aluminum stiffeners on the inner sides, removable seat, detachable oars, holding lines, towing rings, recessed valves, rubbing strake, foot pump, and repair kit. A carrying bag is also included free of charge.

DYNAMIC PRO

The Dynamic Pro series features a high-pressure air floor that is inflated to 0.8 bar, giving the hull a stability similar to that of a rigid hull. Thanks to inflatable trim tabs at the stern, the boats plane extremely quickly and keep the bow flat for optimal handling.

The compact Dynamic Pro 260 is the ideal dinghy for quick trips. Even with just five horsepower, it glides rapidly and stably. Thanks to its minimal packing dimensions, it fits anywhere when every inch counts on board.

The Dynamic Pro 310 offers the perfect balance between more space for family and friends without compromising on maneuverability. It remains agile even when loaded. The oars can be cleverly secured on the inside to make the entire interior usable.

The flagship Dynamic Pro 370 offers comfort for longer trips and still fits in the trunk without a trailer. It stands out with integrated Railblaza mounts for accessories and an anchor roller at the bow, making it perfect for camping vacations.

All models are made of durable PVC material with a thickness of 0.8 millimeters and welded seams. Since 2022, the transoms have been completely PVC-coated to protect them from rotting. Practical details such as tank mounting straps and ergonomic handles round off the robust overall package.

Scope of delivery:
1 removable, sliding wooden seat board, 2 detachable oars, safety lines, recessed valves, high-pressure air pump, carrying bag, and repair kit.

POKER ULTRA

The Poker Ultra series combines modern design in light gray with black accents and generous space. The heart of these boats is the stable aluminum floor, which ensures a firm footing and allows the boat to sit firmly in the water. Since all models can be completely dismantled, no trailer is necessary and transport is easy in the trunk of a car.

With an interior length of almost three meters, the entry-level Poker Ultra 380 model already offers plenty of space for family outings. Those looking for even more freedom of movement will find even larger dimensions in the Poker Ultra 420 and the flagship Poker Ultra 450, with interior widths of one meter. A special highlight is the optional inflatable sunbed. This lounger transforms the bow area into a comfortable relaxation zone and offers valuable additional storage space for equipment underneath.

In terms of equipment, the series relies on the flexible Railblaza system. Integrated brackets allow accessories such as bimini tops or bathing ladders to be installed in a flash without the need for tools. At the bow, there is another base with a cleat that makes it easy to attach lines or navigation lights. A robust bow roller protects the material from friction when anchoring.

The durable PVC material with a thickness of 0.8 millimeters and welded seams ensures longevity. Since 2022, the transoms of all models have been completely coated with PVC, which permanently prevents rot. In addition, a drain valve at the rear facilitates the drainage of water. Well-thought-out details such as ergonomically placed handles for the helmsman and a belt system to secure the tank round off the overall package.

Scope of delivery:
2 removable, sliding wooden seat boards, 2 detachable oars, safety lines, recessed valves, high-pressure air pump, carrying bag, and repair kit.

POKER HEAVY DUTY

WITH MANY EXTRAS ESPECIALLY FOR RESCUE ORGANIZATIONS OR DIVING

From our "POKER" model series, we have developed a special work dinghy with many extras for fire departments and rescue organizations.

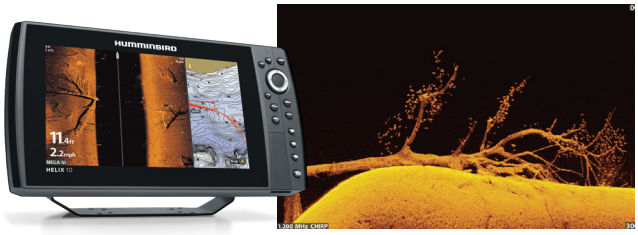

These boats comply with the requirements of fire departments for inflatable boats according to section 5.2.2.1 of the Standards Committee for Firefighting March 2001. They are built in accordance with E DIN EN ISO 6185-1 to E DIN ISO 6185-3 and EC Directive 2013/53/EU (required for CE conformity declaration for recreational craft).

An inflatable V-keel gives the boats stability when turning, and the sturdy side struts on the removable aluminum floor panels prevent the boats from twisting, even in heavy waves. The thick tubes, with diameters of 45 and 53 cm, respectively, ensure particularly high buoyancy and load capacity. Many extras, such as strong and wide rubbing strakes, sturdy carrying handles, coaming with eyelets and long holding loops, grip straps on both sides of the bow area, eyelet straps and Velcro tabs on the inside of the boats for attaching objects, a bollard with rope clamp at the bow, and fastening rings in the bow area inside and outside round off the boat's special suitability for diving and rescue organizations. Two seat boards are included in the scope of delivery.

Oberwaltersdorf Volunteer Fire Department

Experience total clarity even in murky water or at night! HUMMINBIRD brings you surprisingly clear, photo-like images of structures on the bottom, objects floating or sunk in the water, or fish. You can search an area in minutes that would take hours with a conventional sonar device. Fix the GPS position of a promising structure with a single button press on your screen and return to this point at any time.
You can find more information and details about HUMMINBIRD in our catalog F.

POKER HEAVY DUTY - A BOAT FOR RESCUERS!
The popular rescue boat for rescue and diving organizations.
NOW on our YouTube channel!

THE EXTRAS:

- Strong and wide rubbing strakes protect the boats in case of impact with walls or objects.
- The underside of the boat is also covered with long protective strips.
- Strong carrying handles on both sides enable quick land transport by several people, even when the boat is loaded with equipment.
- A coaming with eyelets and long grab lines provides a good handhold for both rescue personnel in the boat and people in the water.
- Since rescue operations are very often carried out from the bow, grab straps attached to the sides of the bow area provide emergency personnel with a secure handhold.
- There are eyelet straps on the inside of the boat for securing items such as diving tanks.
- Boat hooks, for example, can be attached to Velcro straps on both sides inside the boat.
- There is a bollard with a rope clamp at the bow for attaching an anchor line.
- Items can be lashed down or the ends of throwing lines with lifebuoys can be attached to fastening rings in the bow area, inside and outside.

Foldable transport and slip wheels

These new transport and slip wheels are made of durable plastic and are screwed directly onto the transom of the inflatable boat. The wheels, which have a diameter of 140 mm, can be positioned in three different positions using a spring mechanism.

56 3457

Inflatable boat wheels

These wheels for manually towing inflatable boats are supplied complete with detailed installation instructions for the transom. The special mounting and connecting parts allow the wheels to be easily folded up and locked in place . Removal is also easy. Diameter of pneumatic wheels: 360 mm.
Maximum load capacity 180 kg

model	height	Weight	Order No.
universal	70 cm	6.0 kg	56 3445
for Allroundmarin inflatable boats	80 cm	6.2 kg	56 3495

Tow truck

This trailer for inflatable boats is made of galvanized steel tubing with plastic over. An ideal addition to our trailer wheels, allowing even one person to transport an inflatable boat with ease.

	diameter	Order No.
Spare pneumatic tire	360 mm	56 3447
Plastic spare wheel for sandy soil	390 mm	56 3448

Wheels for inflatable boats (Dynamic model)

Fold-up transport and slip wheels, Mone parts and shaft made of NIROSTA AISI 316. The special mounting and connecting parts allow the wheels to be easily folded up when traveling in water and just as easily folded down for slipping and transport on land. Wheels Ø 26 cm, weight 5.8 kg, max. load capacity 100 kg, tube Ø 30 mm. 56 3454

Towing vehicle, 360° rotatable

This trailer made of galvanized steel tubing and pneumatic tires (, 260x85 mm) can be dismantled and the drawbar can be rotated

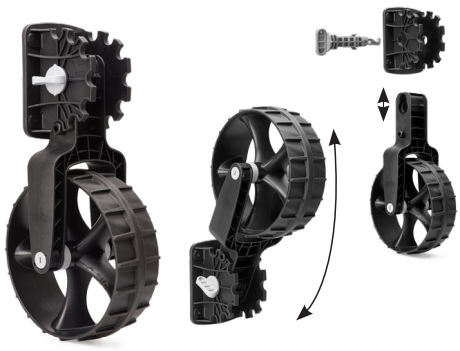

360°.
An ideal combination in conjunction with inflatable boat wheels at the stern, allowing the boat to be transported by just one person. Payload 100 kg

97 8482

THE ULTIMATE INFLATABLE BOAT WHEELS

These inflatable boat and dinghy wheels are a simple but robust option for transporting inflatable boats, as well as lightweight aluminum boats, to the beach, avoiding the need to carry the heavy load yourself. The wheels have a simple locking and unlocking mechanism in the lower and upper positions. The wheels and axle assembly can be easily and conveniently removed from the transom or the permanently mounted snap-in brackets for storage away from the sun when the boat is not in use.

- Made of UV-resistant fiberglass reinforced plastic
- Weight only 4 kg
- Recommended for boats up to 3.6 meters
- Recommended working load up to 100 kg incl. Outboard motors up to 9.9 hp
- Easy installation and assembly
- Easy to engage and disengage the wheels
- Multiple wheel positions adjustable
- Wheel diameter 25 cm, width 10 cm
- Connecting elements and axles made of stainless steel

KAYAK AND INFLATABLE BOAT TRANSPORT AND SLIP TRAILER MODEL C-TUG

This new C-TUG transport trolley is ideal for kayaks and smaller inflatable boats. It is made from high-quality polymer and is therefore completely rustproof. The axles are made from stainless steel. The support surfaces are infinitely adjustable and can therefore be adapted to any keel shape. The contact surface of the C-TUG is coated with a special coating that largely prevents kayaks or small rigid-hulled boats from slipping. The 10" (25.4 cm) wheels have a ribbed rubber tread vulcanized onto them, ensuring a smooth ride even on hard surfaces such as asphalt. The wheels are secured with captive clips. A center support that can be folded in both directions holds the slip trailer in position so that the kayak or inflatable boat can be easily loaded without the help of a second person.

After launching, the strap can be loosened and the C-TUG lifted sideways into the boat using the strap. The C-TUG can be dismantled in approx. 20 seconds without the need for tools and stored in a very small space.

Scope of delivery includes 2-piece belt (1.2 + 1.6 m)

Technical data:

Overall width:	62.00 cm
Height with flat support surfaces	33.00 cm
Wheel diameter/width	25.4 x 9.10 cm
Weight without packaging	3.90 kg
Weight including packaging box	4.20 kg
Dimensions of the box:	58 x 27 x 19 cm
Load capacity per C-TUG:	maximum 120 kg

Models including 2-piece belt (2.8 m)	Order No.
