KAYAK AND INFLATABLE BOAT TRANSPORT AND SLIP TRAILERS: MODEL C-TUG

This new C-TUG transport trolley is ideal for kayaks and smaller inflatable boats. It is made from high-quality polymer and is therefore completely rustproof. The axles are made from stainless steel. The support surfaces are infinitely adjustable and can therefore be adapted to any keel shape. The contact surface of the C-TUG is coated with a special coating that largely prevents kayaks or small rigid-hulled boats from slipping. The 10" (25.4 cm) wheels have a ribbed rubber tread vulcanized onto them, ensuring a smooth ride even on hard surfaces such as asphalt. The wheels are secured with captive clips. A center support that can be folded in both directions holds the slip trailer in position so that the kayak or inflatable boat can be easily loaded without the help of a second person.

After launching, the strap can be loosened and the C-TUG lifted sideways into the boat using the strap. The C-TUG can be dismantled in approx. 20 seconds without the need for tools and stored in a very small space.

Scope of delivery includes 2-piece belt (1.2 + 1.6 m)

Technical data:

Overall width:	62.00 cm
Height with flat support surfaces	33.00 cm
Wheel diameter/width	25.4 x 9.10 cm
Weight without packaging	3.90 kg
Weight including packaging box	4.20 kg
Dimensions of the box:	58 x 27 x 19 cm
Load capacity per C-TUG:	maximum 120 kg

Models including 2-piece belt (2.8 m)	Order No.

---	---------

Pair of straps, 4.5 m, with 2 rubberized buckles, 25 mm wide	91 5065
--	---------

CONNECTING AXLE FOR C-TUG TRANSPORT AND SLIP TRAILERS

There were many requests for a system to connect two C-TUGs in order to transport heavier or larger kayaks, dinghies, and small RIBs. The solution is this sturdy connecting axle with a tube wall thickness of 3 mm, which creates the appropriate distance between the two C-TUGs and connects them. The connecting axle is supplied with two 2.5 m straps without buckles.

Connecting axis including 2x 2.5 m straps	Order No. 91 5242
---	-------------------

KAYAK AND INFLATABLE BOAT TRANSPORT AND SLIP TRAILER: MODEL C-TUG R

The next stage of evolution: The C-Tug R builds on the most popular features of the C-Tug series and features hull supports that allow you to position your C-Tug perfectly without tools to reduce the tow load and get on the water faster.

The C-Tug R is compatible with all kayaks and boats that the original trolley was suitable for—and more! It now also fits a wider range of other kayaks and their hull profiles.

Features:

- Fits disassembled into most kayak hatches
- Lightweight and easy to handle
- Puncture-proof, non-slip wheels with rubber tread
- Non-slip hull pads

FUSELAGE SUPPORTS - CONVERSION KIT

THE ULTIMATE INFLATABLE BOAT WHEELS

These inflatable boat and dinghy wheels are a simple but robust option for transporting inflatable boats, as well as lightweight aluminum boats, to the beach, avoiding the need to carry the heavy load yourself. The wheels have a simple locking and unlocking mechanism in the lower and upper positions. The wheels and axle assembly can be easily and conveniently removed from the transom or the permanently mounted snap-in brackets for storage away from the sun when the boat is not in use.

- Made of UV-resistant fiberglass reinforced plastic
- Weight only 4 kg
- Recommended for boats up to 3.6 meters
- Recommended working load up to 100 kg incl. Outboard motors up to 9.9 hp
- Easy installation and assembly
- Easy to engage and disengage the wheels
- Multiple wheel positions adjustable
- Wheel diameter 25 cm, width 10 cm
- Connecting elements and axles made of stainless steel

RAILBLAZA STARPORT, SIDEPORT & RIBPORT MOUNTS WITH STAR MOUNT

These mounts are a unique and extremely versatile fastening system with many possible applications. They can be mounted on horizontal, vertical, or sloping surfaces. The Ribport version can be glued to inflatable boats in any position. The STARPORT star mount with its unique locking slider allows the entire range of accessories equipped with a star-shaped adapter (counterpart) to be mounted and replaced. The material is high-quality plastic, except for the adhesive part of the Ribport for inflatable boats, which is made of elastic PVC. All parts are easy to install and look good too. They can be mounted on motorboats, sailboats, and inflatable boats, as well as on fishing boats, kayaks, quad and rowingboats, and many other places.

All individual Starport, Sideport, and Railmount packages, as well as large Railmount packages, are supplied with screws. Large Starport and Sideport packages are supplied without a screw set.

Special-design STARPORTS and SIDEPORTS for American boats

On many American fishing boats, in the side walls at the top on the inside a integrated hollow rail. Rainblaza has special StarPort's and SidePort's developed, which work with

The included rail screws fit into these hollow rails. **The scope of delivery includes two different rail screws and one plastic adapter.**

The square rail screws fit Crestliner hollow rails and most kayak rails.

The rectangular rail screws are compatible with most other US fishing boats such as LOWE, Lund, Tracker, War Eagle, and many more. The plastic covers complement the rectangular screws to fit Railblaza hollow and coaming rails as well as those from Horizon and Stessl boats in Australia, and they protect against salt water.

BIMINI RAIL MOUNT

The Railblaza Bimini Railmount is a bracket that allows for safe and easy mounting of lightweight Railblaza products to your Bimini round or square tube. This bracket secures accessories such as navigation lights, strobe/floodlights, action cameras, and much more at height without installing an additional pole.

The Bimini RailMount is assembled without drilling, so it can be easily removed and your bimini remains undamaged. Different rubber inserts are supplied for different bimini tube thicknesses, which also prevent slipping. The plastic is UV-stabilized.

For square rails 28 or 32 mm and
For round tubes 19, 22, or 25 mm.

Scope of delivery: 1 x Bimini Railmount, 1 x StarPort, 8 x non-slip rubber inserts, and two M6 x 30mm and M6 x 16mm screws & molybdenum-coated nuts each. The second package also includes the 360° rotating beacon 915129.

ROD TUBE

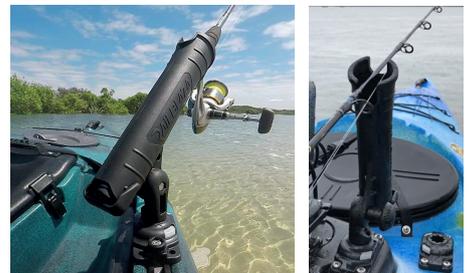

A perfect fishing rod holder with an extended housing, where the fishing reel is raised and out of reach of waves and splashing water. Thanks to the innovative, lower-lying Railblaza joint, you can either keep the reel high and dry or snap it into the slot at the end of the tube. A fishing rod holder that is ideal for low kayaks. Inner diameter: 41 mm

RAILBLAZA TACKLE STATION

Maximize your adventures with the RAILBLAZA tackle storage box. Benefit from innovation and durability, whether you're exploring calm waters or mastering challenging currents.

- Some of the outstanding features and flexibility of this box include, for example, recesses on the outside of the corners for storing your fishing rods, rod tubes, or landing nets.
- Regardless of the size of your fishing arsenal, you are not hindered by equipment restrictions, as you can customize the box with RAILBLAZA accessories such as TracLoaders, StarPorts, or MiniPorts with star mounts, or mounting rails, e.g., two on each side or one on the lid.
- These star mounts or rails allow you to attach a variety of important fishing accessories to the box, such as a practical drink holder, an action camera, lighting, a spooling station, and much more.
- This box makes transitions from land to water easy and transporting equipment to your kayak, fishing boat, or inflatable boat effortless.
- Enjoy the journey with this RAILBLAZA Tackle Station, a great companion for outdoor adventures.

BAIT BAG LOOPS

Chaos in your tackle box is a thing of the past. These loops (Loopty Loops) keep your soft baits, tackle, lures, leader material, etc. sorted, tangle-free, and ready for use. Sturdy, vinyl-coated stainless steel cable with screw cap and clever "grab-and-swap" design make organizing your gear really fun. Two lengths, 12" (30 cm) and 6" (15 cm) circumference, are available in three colors per bag (2xgreen, 2xsilver, 2xblack). Price per bag.

model	Order No.
Bag with 12" loops	91 5377
Bag with 6" loops	91 5378

Robust box for every adventure

- 4 recesses for storing rods, landing nets, etc.
- Space for up to 8 tackle boxes
- e systems
- Can be expanded with Railblaza accessories by mounting multiple attachment points.
- Recessed handles
- Non-slip rubber feet
- Stainless steel mounting parts
- Made from recycled material
- Low weight of 2.75 kg
- Dimensions of the Tackle Station: 330x330x330 mm
- Box dimensions before assembly: 375x350x165 mm

NIGHT OPS STARPORT LED LIGHT

This LED light is designed for tracking predatory fish after sunset or for spearfishing in the dark. Night Ops is the lamp for those who enter the water when others are fast asleep. For anglers, divers, boaters—in other words, for anyone who doesn't fear the dark, but embraces it. Night Ops is completely waterproof and submersible to 45 meters. It provides powerful, dazzling white light up to 3800 lux, or 3120 lux red light for camouflage mode or discreet lighting. With integrated dimmer, rechargeable lithium battery, and battery status indicator. Compatible with StarPort systems.

Order No. 91 5381
 Night Ops Starport LED Light

SPOOLING STATION

The Railblaza Spooling Station is designed to spool your line effortlessly and on your own, without having to remove the reel from the rod. The shaft is designed to adjust to the height of a variety of spools. It is suitable for spools up to 50mm thick and max. 115mm in diameter. It has an integrated brake to maintain spool tension and prevent unwanted unwinding. The swivel base allows the spooling station to move freely and follow the movement of the rod tip.

The fasteners and connecting elements are made of stainless steel, and the spooling station is made of UV-stabilized, glass fiber-reinforced plastic.

ECHO SOUNDER TRANSDUCER - MOUNTING KIT FOR KAYAKS, CANOES, AND INFLATABLE BOATS

These echo sounder and transducer mounts were developed for anglers who need a quick and easy mounting and removal option. With these sets, you can mount or remove your fishfinder or echo sounder and transducer in seconds. The corresponding mounting plates or mounting clips for the sonar transducers compatible with your fishfinder can be mounted on the side arm adapter. (Mounting plates, mounting clips, sonar transducers, and side port or rib port are not included in the scope of delivery).

STABILIZATION KIT FOR BOW MOTORS

Supports the motor shaft and motor head when the bow motor is raised and locked into the motor mount. A flexible strap holds the shaft in place. This prevents the motor head from rocking and banging during travel, but also when transporting the boat on the road. When the bow motor is in use, the stabilization kit can be removed from the base to create a clear deck. Compatible with MINN KOTA Ulterra, Terrova and Power Drive. Height incl. Starport: 160 mm

FILLETING AND UNIVERSAL TABLE

This 525 x 350 x 50 mm filleting table comes with two swivel platforms with star adapter no. 915044, which are included in the price and can be attached to the underside of the table in various positions. This allows the filleting table to be tilted forwards and backwards. On the inside of the 50 mm high rim, which covers 3 sides, there is a channel that collects the filleting liquid. In the middle of this channel on the rear wall, there is a hole that is still tightly closed upon delivery but can be opened if necessary. On the underside of the table, exactly at this point, there is a 3/4" drain connection to which a hose could be connected to dispose of the filleting liquid in a container.

ANCHORPOINT SMARTPHONE HOLDER

Your phone isn't just a tool—it's a navigation system, sonar screen, and SOS signal transmitter. So forget about wobbly phone mounts. The Anchorpoint clamps your device with five-point silicone grips, absorbs shocks with vibration damping, and allows angle adjustments with 360° rotation. Precision-milled aluminum, quick-release levers, universal fit, and StarPort compatibility make this mount the only one your phone will ever need—on the water, trail, or road.

RAILBLAZA HEXX™

THE MOUNTING SYSTEM WITH EVEN GREATER STABILITY

Immerse yourself in the new innovative system, which builds on proven stability while offering enhanced resilience. Just as versatile and adaptable as the tried-and-tested Starport system, the new **HEXX™ series** offers a wide range of mounting options for hulls, rails, tubes, and pipes. Whether it's water resistance or the use of tow rods, our system masters all these challenges with ease. And best of all, with an ever-growing range of accessories, there are no limits to your customization options. Immerse yourself and discover a world of unlimited possibilities!

All HEXX products with HEXX bases are supplied with screws.

HEXX™ BASE

The HEXX™ base can be mounted anywhere and serves as a replacement base or additional base on your boat for our new HEXX™ mounts. The mounting screws are included in the scope of delivery.

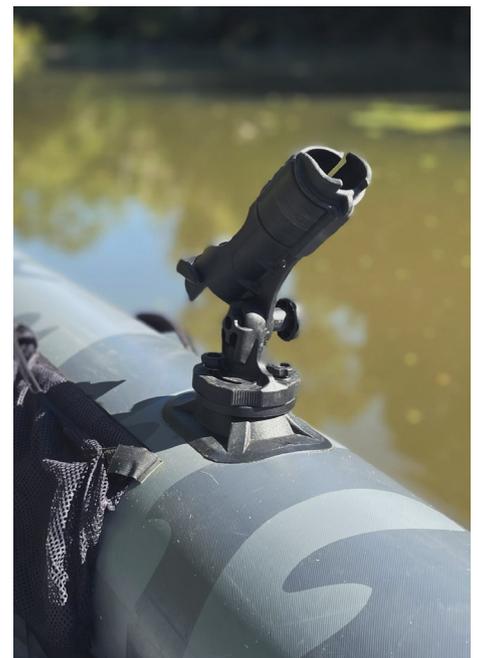

model	Order No.
HEXX base, diameter 86 mm	91 5206

HEXX™ RibPORT

These HEXX™ rib ports can be mounted on inflatable boats, belly boats, or other inflatable boats and kayaks using a suitable adhesive. They provide a secure base for rod holders or echo sounder mounts for the HEXX™ system, for example.

HEXX™ FISHFINDER MOUNT

Fishfinders are getting bigger and bigger – time for Railblaza to launch its strongest fishfinder mounts yet! The new HEXX™ fishfinder mounts are available in two versions, **with** and **without a joint**, and impress with their increased stability and impressive price/performance ratio.

With a 5" (127 mm) extension arm, it is built for tours that push your equipment to its limits. With this 5-inch aluminum shaft and fiberglass-reinforced composite ends, it offers maximum holding power with minimal weight. Designed to eliminate wobble, absorb shocks, and lock electronics securely in place even in brutal conditions.

The HEXX™ Fishfinder Mount with joint is designed for heavy fishfinders with a weight of up to 3 kg or a 12" screen. They offer a base rotation of 90°, a platform rotation of 90° and a tilt range of 180°, so you can mount your fishfinder wherever you need it.

The HEXX™ rotating platform without joint is designed for particularly heavy fish finders weighing up to 5 kg. This sturdy, elegant yet lightweight platform weighs only 495 g. The screen can be rotated 90° and locked in place on the base.

HEXX FISHING ROD HOLDER "II"

RAILBLAZA fishing rod holder Model "II," but completely connected to a HEXX mounting base. This base is particularly robust and allows for lockable, stepless rotation, both horizontally and vertically, of 90°.

model	Order No.
HEXX rod holder, black	91 5207
HEXX Rod Holder, white	91 5366

STRAIGHT SHOOTER LIVE SONAR ARROW DISPLAY

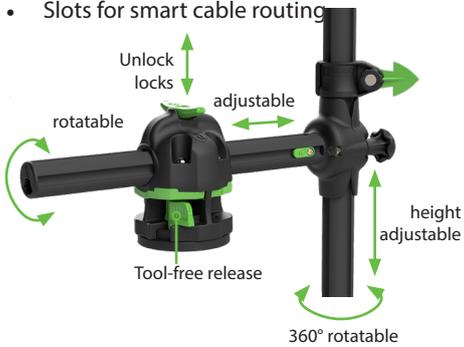

The RAILBLAZA Straight Shooter ensures that every second works in your favor. Designed from highly secure "green" for quick and reliable direction detection, especially when navigating. This forward-facing sonar arrow indicator revolutionizes your fishing experience and navigates you safely and accurately through the waters. With a 1.25" (3.175 cm) clamp/tension ring diameter, the arrow indicator can be mounted on many trolling motors, such as Minn-Kota electric outboards, or on transducer poles for echo sounders, such as the Railblaza HEXX Live Pole 30 or HEXX Live Pole 60, or on pole shafts. Your eye will recognize the desired direction in seconds.

HEXX LIVE POLE 30 & 60 TRANSMITTER POLE

The smart transducer rod for your live sonar! Easy to remove, foldable, and based on the stable HEXX base, this transducer rod ensures that your live sonar transducer is ready for use in no time! The cables disappear into the slots provided in the shaft.

- Suitable for all manufacturers, including Humminbird MEGA Live
- 360-degree swivel
- Stable up to 8 km/h
- Directional arrow points precisely to your destination
- Fully adjustable, inside and outside the boat
- Easy to remove without tools unlocking
- Pole can be folded to half its length for Transport (Live Pole 60)
- Slots for smart cable routing

HEXX LIVE POLE 60

Placed at hip height, the soft grip ensures a comfortable feel even in winter. The Hexx Live Pole, measuring 60 inches/1.55 m in length, is attached to the side of the boat and can be quickly unfolded and made ready for use. Its 360-degree range of motion ensures perfect alignment with your target fish. Includes Hexx base and practical carrying bag
